

2018 Steel Resource Guide

Pacific Northwest Steel Fabricators' Association

SEATTLE GALVANIZING COMPANY

THE NORTHWEST'S LARGEST GALVANIZER

Max. Product Size = 44' 6" x 5' 6" x 8' 6"

- ✓ **Lifting Capabilities of 30 tons**
- ✓ **32,000 sq. ft. state of the art facility**
- ✓ **Production Capabilities of 50,000 tons annually**
- ✓ **2 Storage yards consisting of over 6 acres**
- ✓ **Sales consultation**
- ✓ **Sandblasting service**
- ✓ **Barge and job site Pick up and drop off your trailers at your convenience**
- ✓ **Receiving hours 6:00am to 11:00pm weekdays**
- ✓ **Daily trucking service**
- ✓ **Barge and job site delivery available at your request**

The steel industry in the Pacific Northwest is recognized as an established community of immense capacity and capability. Its scope encompasses the largest projects as well as the most technically exacting, tapping into a deep heritage of metal working experience and knowledge.

This Resource Guide is provided by the Pacific Northwest Steel Fabricators' Association (PNSFA) as a guide to steel fabricating and processing resources available in the Northwest Region. It is our hope that you will discover this to be an indispensable tool, providing knowledgeable and helpful contacts in all aspects of steel fabrication.

PNSFA encourages the development of the steel industry in the Pacific Northwest, strengthening its infrastructure through the exchange of knowledge and information among its members while also providing exposure to and training from specialists in related fields. Striving to keep steel professionals current and proficient as well as progressive in their approach to their industry is PNSFA's goal.

The PNSFA membership enjoys the company and benefit of producers of steel plate, structural members, pipe and tubing. We include steel distributors, processors, fabricators, providers of machining services, coatings, fasteners, equipment and others. For fabricator and associate membership information visit our website at www.pnsfa.org, or contact us at 503.253.9030.

PNSFA Past Presidents Since 1989

1989 - Darrell W. Jesse <i>Jesse Engineering Co.</i>	2000 - Greg Duthie <i>Standard Steel Fabricating Co., Inc.</i>	2009 - Gust Erickson <i>Jesse Engineering Co.</i>
1990 - Merv Wark <i>Yakima Steel Fabricators, Inc.</i>	2001 - John Robertson <i>Robertson Grating Products, Inc.</i>	2010 - Alan Halamay <i>Fought & Co., Inc.</i>
1991 - Steve Norquist <i>Western Steel Mfg. Co.</i>	2002 - Paul Davis <i>Redi-Fab, Inc.</i>	2011 - Troy Ruff <i>Robertson Grating Products, Inc.</i>
1992 - Terry Aarnio <i>Oregon Iron Works, Inc.</i>	2003 - Tom Hickman <i>Oregon Iron Works, Inc.</i>	2012 - Pat Prentice <i>The Lynch Company, Inc.</i>
1993 - Dave Williams <i>Universal Structural, Inc.</i>	2004 - Jeff Hayes <i>Brooklyn Iron Works</i>	2013 - Kevin Duthie <i>Standard Steel Fabricating Co., Inc.</i>
1994 - Dave Williams <i>Universal Structural, Inc.</i>	2005 - Jeff Hayes <i>Brooklyn Iron Works</i>	2014 - Matt Smith <i>L&M Industrial Fabrication</i>
1995 - Ron Duquette <i>Ideal Steel, Inc.</i>	2006 - Drew Park <i>Columbia Wire & Iron Works, Inc.</i>	2015 - Matt Smith <i>L&M Industrial Fabrication</i>
1996 - Keith Mabin <i>Richardson Metal Works, Inc.</i>	2007 - Drew Park <i>Columbia Wire & Iron Works, Inc.</i>	2016 - Ken Oliver <i>KO Custom Fab, Inc.</i>
1997 - Jeff Gellert <i>Jesse Engineering Co.</i>	2008 - Jim Duthie <i>Standard Steel Fabricating Co., Inc.</i>	2017 - Thane Giles, P.E. <i>Vigor</i>
1998 - David Marks <i>Marks Metal Technology</i>		
1999 - David Marks <i>Marks Metal Technology</i>

Farwest

*Whatever your structural steel or processing needs are,
Farwest will deliver quality metal solutions that drive your success.*

Farwest has a broad range of processing capabilities including:

- Laser cutting 24 gauge stainless sheet up to flame cutting 12" plate.
- Structural laser cutting ornamental tubing or 10" schedule 40 pipe.
- Precision forming small parts with tolerances measured in thousandths, or forming 50' lengths to eliminate splicing.

Delivering truckloads of base plates or intricately notched and coped ledger angles to 50' in length are just a couple of examples of promoting our customers' success in the structural fabricating industry. Farwest can roll, drill, punch, bevel and saw cut.

Farwest's vast inventory of wide flange beam, angle, structural tube, plate, and fabrication and processing equipment puts our customers in exceptional positions to succeed in the competitive markets of structural fabrication.

From roads & bridges to high-rises or water treatment plants, we have the expertise and equipment to deliver on-time solutions for your fabrication projects.

Farwest Steel has the ability to do it all. Contact us today to find out how Farwest can help you with your next project!

AISC Certification

What is AISC Certification? How can it benefit my construction project?

You may have heard of AISC Quality Management Systems (QMS) Certification, but you may not know exactly what's involved. AISC's certification programs set the quality standard for the structural steel industry and are the most recognized national quality certification program for the industry. Our programs focus on the entire process of fabrication and erection. Our goal is to build quality structures from the start by focusing on error prevention rather than error correction.

Certified companies have been through a rigorous initial evaluation and are subject to annual audits. These evaluations require a comprehensive administrative review, a documentation audit, and an on-site audit of the firm's quality management system. This is significantly different than "product inspection," since inspection does not focus on the root cause of the error and preventing it from happening again. An initial certification may take up to six months to complete but the annual cost is relatively moderate at less than \$5,000 for an AISC member fabricator with fewer than 99 employees.

During the on-site audit, a company's day-to-day operations are compared with the documented procedures from its quality management system. A general list of core quality criteria is shown to the right for both fabricators and erectors. The program requires the company to be accountable for all facets of its organization, from management responsibility to employee training to material purchasing and handling to project specific erection plans.

A key feature of our program is that we require participants to set goals so that they continually improve over time. Even the best and brightest firm – regardless of size – can benefit from having its quality procedures reviewed on a regular basis.

Finally, here's a few ways how AISC Quality Management Systems Certification adds value to your project and reduces your risk:

- **It assists in achieving your desired level of quality:** Have you run into issues on projects that didn't require AISC Certification—or on projects that specified AISC Certification but the requirements were waived? Nobody likes to find mistakes, especially ones that cost the project time or money. AISC's program is designed to check that companies don't just say they have procedures in place—but are actually following them. Through the auditing process, the program verifies a company's QMS is meeting the certification requirements and therefore meeting your specified level of quality.
- **It helps evaluate and prequalify bidders:** Sometimes you just don't have a relationship with fabricators or erectors near your project. Or maybe the project team needs a short list of bidders. Selecting AISC-Certified companies can identify a steel team that has an active, dedicated quality management system in place and adhered to. The easiest way to find an AISC-Certified fabricator or erector is to visit www.aisc.org/certsearch.

- **It provides more value to your project:** Section 1704 of the International Building Code (IBC) and Chapter N of the AISC Specification for Structural Steel Buildings allow for the waiving of special inspection requirement for structural steel fabricators and erectors approved by the authority having jurisdiction (AHJ). Most AHJs approve AISC-certified fabricators and erectors. This saves the project money and time because those inspections are performed by the fabricator or erector with their own in-house staff.

For additional information, please visit www.aisc.org/certification or contact us at 312.670.7520 or certification@aisc.org.

Year Established: 2009

Description: B3LC offers precision three-dimensional tube and pipe bending and fabrication in a variety of materials and sizes. Our 3-axis, 2-axis, and roll-bending CNC machines produce repeatable parts and high accuracy levels measured in tenths of degrees. We can accommodate square, rectangular and round tube/pipe and flat, angle and round bar. For applications that require long runs of tube, we offer tube-joining services, including end-welding, swaging, and coupling. Through our network of high-quality sub-contractors, we can also provide large material roll bending and plate forming, laser and plasma cutting, galvanizing, powder coating, and a variety of other manufacturing services. We deliver high quality products on time and work with customers to accommodate short turn-around and other scheduling requirements, plus quantity variations.

Advantage Steel: The Top Ten Reasons to Specify Structural Steel

- 1. Large clear-span bays**
Structural steel framing easily and economically provides large clear-span bays with fewer columns, giving more flexibility and efficiency in planning, layout, and occupant traffic flow.
- 2. Ease of expansion**
Structural steel buildings can be easily expanded in any direction.
- 3. Ease of change**
When building uses change or are improved, structural steel can be easily modified and reinforced to accommodate the new requirements.
- 4. Ease of reinforcement modification**
Standard, uniform, homogenous, prismatic structural steel shapes permit quick and efficient reinforcement and modification.
- 5. Simplicity of design**
Structural steel members can be designed more easily than any other structural material or structural system, and later analyzed and modified with the same ease and simplicity.
- 6. Reduced construction time**
Structural steel framing can be rapidly designed, purchased, fabricated and erected without need for shoring, curing and other delays of concrete and masonry construction. It readily lends itself to fast-track construction through advance purchasing of steel prior to award of the general contract.
- 7. Reduced construction financing costs**
Since steel can be erected more quickly, the building can be occupied sooner. Interest costs during construction are reduced and cash flow from operations begins earlier.
- 8. Superior seismic performance**
Steel's durability makes it the premier structural material for economically resisting earthquakes. An owner must consider both life safety and how much of the structure is recoverable after a seismic event. Steel framing maximizes both of these factors.
- 9. High resale value**
Because of a structural steel building's ease of expansion, renovation and reinforcement for future changes and for the needs for new occupants, the value of a steel-framed building remains high.
- 10. Complete recyclability**
Most steel today is a recycled product, and nearly all structural steel from building demolition is recycled. This provides salvage value, reduces demolition expenses, reduces landfill volume, reduces tipping fees, and helps the environment.

PNSFA Membership Offers You These Opportunities. . .

- Network with your peers and receive valuable education at our Annual Conference
- You and your employees can attend our meetings which provide timely, industry specific information and education
- A listing in this *Resource Guide* and on our website serves as a valuable marketing tool in the Northwest and beyond
- For membership information, contact the PNSFA office at 503.253.9030 or via email at info@pnsfa.org or via our website at www.pnsfa.org

Steel Fabricating Contractors in Washington, Alaska, & Hawaii

Experience You Can Count On!

When you trust in Standard Steel Fabricating you get a company that offers the best product at a reasonable price. With over 80 years in business, we have the experience and expertise to take on jobs of all sizes. Our clients choose us because we offer unmatched expertise and service.

Our services and expertise cover a wide range of applications including:

- Structural Steel Components
- Architectural Steel Elements
- Stairway Systems And Railings
- Utility Substation Structures
- Box Girders
- Marine Structures such as Dolphins & Gangways
- And Much More

We've earned our client's trust by:

- Maintaining Quality Control On All Products
- Offering On Time Delivery
- Meeting Safety Requirements, Codes, & Practices
- Offering Fast And Efficient Production

With an experienced team on our side, we are able to produce up to 300-tons of structural fabricated products per month. Our products can range up to a maximum length of 120-ft. and have an overall lifting capacity at 20-tons. With such diversity, we have the ability to take on all types of projects of different sizes ranging from construction clientele to industrial, institutional, commercial and marine and more.

We have membership in the following professional associations
